

Find Contact Information Easily Through a Centralized Directory

Overview

Zephyr Phone Directory is a unified phone directory that makes finding contact information within the organization easy. The search capability allows employees to specify search criteria by defining fields: Name, e-mail, business entity, or department. The Intranet directory provides all the contact information of the employee, including phone number, mobile number, fax and e-mail.

Besides trying to locate contact information of employees within the organization, employees may need to locate phone directory for common facilities or area within the company, i.e. Meeting Rooms, Conference Room, Guard Room etc. The Location Phone directory allows an organization to maintain a central phone directory for all the company’s common areas and facilities.

Key Features	
Search Capability	<ul style="list-style-type: none"> Allow search for contact information with the following search criteria <ul style="list-style-type: none"> Wildcard search on Employee’s Name and Employee’s Email Search by Business Entity and Business Unit/Department
